

I am in the United States Military and have to travel on a regular basis to and from my home base and the Washington D.C., Ft. Meade-Baltimore area. I find the XM weather and traffic announcements to be an invaluable tool for me. If you take this away I would have to listen to the radio and try and find someone that is giving traffic updates more than every 20 minutes and in between all the other "stuff" that they put on the air. XM puts on the weather and traffic and only those things on those channels. To stop them from airing that would be a great injustice to the people that pay their monthly subscription fee. Please do not take my XM away from me in anyway, shape or form. Thank you for your time and consideration in this matter.
